

Forum on Creativity in the Arts, Science & Technology 2006 Fact Sheet

The Forum on Creativity in the Arts, Science and Technology was first established in 2001 to showcase how creativity transcends the borders of arts, science and technology. As in previous years, this year's event will feature several preeminent local and international speakers who will speak on the importance and examples of creativity in their respective fields.

Objectives

The event aims to showcase creativity transcending the borders of arts, science and technology, as well as foster interaction between teachers and practitioners in these disciplines.

Target Audience

The Forum on Creativity is targeted at all Singaporeans and Singapore residents, in particular teaching staff from educational institutions, parents, secondary and tertiary students; and industry players from all disciplines in the Arts, Science and Technology.

Programme

Please refer to Annex B for the programme and to Annex C for details of the speakers.
